

## **.NET Desktop Developer (Avalonia / WPF) (f/m/d)**

**Full-time, Location: Osnabrück / Remote – Start: May 2025**

### **THE OPPORTUNITY**

As a .NET Desktop Developer, you will play a crucial role in our team and actively shape the development of OneWare Studio – our open-source IDE for electronics development. Help us build and improve the IDE and its extensions – including our One AI Extension.

### **YOUR ROLE**

- **Take responsibility:** Help develop and improve OneWare Studio and our extensions. Listen to community feedback and suggest changes independently.
- **Drive innovation:** Contribute your ideas to the development of OneWare Studio.
- **Collaborate:** Work closely with an ambitious team to actively shape the future of electronic development tools.
- **Advance technology:** Build modern user interfaces and create efficient solutions for technical applications.

### **YOUR PROFILE**

- **Technical expertise:** Experience in .NET development, particularly with C#. Experience with UI Frameworks like WPF or Avalonia is a big plus. You have no problem using GIT and GitHub
- **Independence:** You work independently, structured, and solution oriented.
- **Language skills:** Fluent in English, German is a plus but not strictly necessary
- **Innovation and drive:** You are eager to actively shape future technologies and are passionate about AI, automation, and innovation.

## OUR OFFER

- **Exciting projects:** Work on AI-driven projects with real-world impact.
- **Company culture:** Open, creative, and agile startup environment where your work has a significant impact on company success.
- **Startup experience:** Direct collaboration with the founders and leadership team.
- **Flexibility:** Flexible working hours (remote/hybrid) & trust-based work.
- **Benefits:** Competitive salary and attractive additional perks.
- **Appreciation for Achievements:** A culture of appreciation that recognizes and fosters outstanding performance.

## ABOUT ONE WARE

Shape the future of AI with ONE WARE! We are redefining industrial automation with groundbreaking AI that enables real-time quality control and error prediction with unparalleled precision. As the first in the world, we offer a tailor-made AI solution for the industry that continuously adapts to specific applications and hardware, delivers results in microseconds, and self-optimizes. ONE WARE integrates seamlessly into existing systems and reduces resource requirements by up to 1,000 times compared to conventional AI models – enabling faster workflows and drastically lower operating costs. We are a true game changer in industrial manufacturing.
