

## AI Developer (f/m/d)

Full-time, Location: Remote / Osnabrück – Start: May 2025

### THE OPPORTUNITY

As an AI Developer, you will become a crucial part of our team and directly contribute to the development of groundbreaking AI technologies that revolutionize industrial automation. Work on innovative projects that have significant market impacts and develop solutions that transform how industries operate. If you thrive in a dynamic startup environment and love tackling challenges head-on, you are the perfect fit for us.

**Starting Salary: €70,000+ possible** (depending on skills and experience)

### YOUR ROLE

- **Research:** Explore predictive methods of AI architectures and implement these in practical applications.
- **Drive Innovation:** Develop preprocessing and augmentation filters for AI training.
- **Technological Advancement:** Optimize AI architectures for image and sensor processing.
- **Increase Efficiency:** Optimize automated AI training processes.
- **Collaboration:** Work closely with an ambitious team to optimize neural networks for export to various hardware.

### YOUR PROFILE

- **Technical Expertise:** Deep understanding of AI, machine learning, especially in neural networks.
- **Development Skills:** Experience in developing with Python and popular AI frameworks.
- **Problem Solving:** Ability to efficiently solve complex problems and develop innovative solutions.
- **Independence:** You work autonomously and goal-oriented.
- **Language Skills:** Good German or English skills for team communication.

- **Innovation and Drive:** Enthusiasm for the latest technologies in AI and automation.
- **Individual Optimization:** Ideally, experience in individual optimization of universal AI architectures and/or creation of completely individual AI architectures.

## OUR OFFER

- **Company culture:** Open, creative, and agile startup environment where your work has a significant impact on company success.
- **Appreciation for Achievements:** A culture of appreciation that recognizes and fosters outstanding performance.
- **Direct Collaboration with our Founders:** Work side-by-side with our CEO & AI Founder with fast decisions and constant learning culture.
- **Grow into a leadership role:** As we scale, you'll have the opportunity to take ownership of key areas and grow into a leadership position.
- **Flexibility:** Flexible working hours (remote/hybrid) & trust-based work.
- **Benefits:** Competitive salary and attractive additional perks.

## ABOUT ONE WARE

Shape the future of AI with ONE WARE! We redefine industrial automation with advanced AI for IoT devices, enabling real-time quality control and error prediction. We offer tailor-made AI solutions that continually adapt and optimize in milliseconds. Our technology integrates seamlessly into existing systems, dramatically reducing resource needs for faster operation and significantly lower operating costs. We are pioneers in industrial manufacturing.
